

## Amateur Radio Class and Exam Saturday January 12th

A team of SYC instructors, led by Chuck Steward will give a review session to help you get your license in the annual Amateur Radio Class and Exam. This team has been very successful in providing this morning of final test preparation and giving the FCC examination for over 60 of your fellow members. The focus of the class/exam is to provide a final review of the material for the FCC Tech exam to enable a passing grade for the afternoon's exam. For tips on pre-study for the exam call or e-mail Chuck Steward (509) 925-7364, [csteward@elltel.net](mailto:csteward@elltel.net) or Chuck Lowry (425) 453-9872, [beauxarts1@comcast.net](mailto:beauxarts1@comcast.net).

Sign up and get your study materials at the front desk. This popular class has filled up the past two years. Join the 155 SYC members, who are already licensed radio operators and participate next year in this virtual Greenbox community of boaters.

## Members Help Shut-In

The photo at right shows members Bob Swaine, Chris Warner, Dale Sherrow erecting an antenna on the roof of Providence Convalescence Center, under the watchful eye of the Center's staff. Bob Swaine used his extensive expertise to pre-assemble all the small parts into the 30 foot antenna pictured.

## More Information & Local Practice Net

Our Committee meetings are open to all members and guests – we meet on the second Wednesday of the month at 6:00 p.m. at the Portage Bay Mainstation. The meeting schedule for the next few months is: December 12th and January 9th. If you have a 2m radio you are welcome to join our "practice" net – the Puget Sound Boaters Net. We meet at 7:47 a.m. every morning on the 146.88 MHz repeater.
